MEMBER NEWS

Debbie Wass was the lucky winner of our Melbourne Cup Day trip a couple of years ago and has always been a punter and remembers many losing days as she says in this email:

"Garry I'm having more fun at present than I've had in ages. I know my run will have plenty of bad days. Remember I've been in this game for a long time. These new Winform selections suit my style of punting much better than most. I have been using the 4 or greater idea with exclusions like multiple first starters, no wet track or distance form etc. Using the Winform Staking Plan I've more than doubled the bank. I'm now prepared for the inevitable long losing runs that always defy the previous stats. This knowledge only comes with the long term experience and in my case many painful losses. But as we all know there have been more than a few days when there have been many thousands spread on the table, in the days when I was in Sydney and went to the races. Today was fantastic, who could complain about 3k profit? I bet your new Winform selections via money factory with some modifications I have made. I bet my 4 or greater options via Staking Plan and bet race to race doubles. So I bet a further \$5 on each selection and \$10 on the double and rolled them race to race so each horse was in the double twice. I used the SE and Bravo Selections as well. That ended up 14 doubles for \$140 outlay with IAS, 4 successful return \$825 and when I only got 1 leg I had the bet covered. Old fashioned strategy but not a bad idea for those who want to have fun without huge outlays. I have made real money since October 1st 2005. Thanks" Debbie Wass- V.I.C.

"Hi Gary, Just a quick thank you for allowing access to the ratings on Monday, I backed a couple of nice winners which was great. The new selections at the front of the ratings have done well over the 4 days that I have seen. Gary I was wondering if these new selections would work using Money Factory or are they best backed using the 0.3% of your bank as mentioned in your newsletter. Gary also want to thank you and your staff for all the hard work you put into helping to educate small punters like myself, I look forward to your weekly updates and the monthly newsletters, Regards." Jason Cushway- Q.L.D

Garry suggests a softly, softly approach on level stakes but some Members have done well betting the selections each way with Money Factory. Garry has figures for September, which show a \$510 profit for \$10 Level Stakes Bets. P.S. just a reminder that Garry has two r's.

WINFORM SEMINARS

Our next two Seminars are at the Rialto on Collins on November 13th from 2 p.m. to 6p.m. and Alex Read of IAS will be a guest speaker and Peter Andronicus will also attend. They will have a lot of helpful info for Members. We will also be demonstrating Money Factory and Garry will explain the rationale behind the latest successful Winform selection strategies as well as demonstrating his Professional Staking and Money Management strategies. Each attendee will also receive a Free copy of the book.

In Brisbane we will be at the Diana Plaza Hotel at 2 for a similar presentation on November 20th from 2 p.m. to 6 p.m. Our guest speakers will be Matt Elliott and Jesse Kirley who will assist with betting exchanges, Sports betting and Renegade. Cost for each Seminar is only \$99 and we can accept bookings right up until the previous Friday.

The Perth Seminar will still happen but because of our extra costs this will be \$149 and wont take place until about February next year.

SO MUCH MORE POTENTIAL WITH GTX!

The Winform Ratings are based on computerized calculations. These calculations remain consistent with the help of constraints such as: the horse's form, Placings at recent starts, horse name, Winform Odds, win margins, prize money, weight allocated, Barrier position and Win Strike Rate. (*See Winform Ratings Diagram*)

But some Winform Members have an advantage!

They are the people who have subscribed to GTX (A program provided by the The Ratings Bureau) as well as Winform.

This competitive advantage not only allows them to view the last 16 runs of the horses form. Whilst still relying on the principles of the Winform Ratings, it also demonstrates performances past track conditions, distances previously ran, class, past Jockeys, weight, qualifying times but most importantly a Winform Rating (which is scaled on a points between 10 and 100). It is with this additional information that GTX provides the detailed statistical information, which can help you to pick even more winners.

Here is a good example: As seen in the diagram below on Wednesday 19th October- Race 8 the Geelong Cup, horse No. 9 "On A Jeune" with the Winform Ratings was rated 15th amongst a field of 17, and doesn't come into contention based on it's latest form.

| No | Form | Horse | Wodds | Marg | PrzCh | Hcap | BP | WPC | PPC | A# | Wnet | TCDWHB |
|----------|-----------------|-------------------|--------------|------------|-----------|-----------|-----------|-------------|-------------|----------|-------------|-----------|

| 4 | 11412X24 | Envoy | 123.9 | 6.1 | -682 | 55 | 12 | 18.2 | 39.4 | 8 | 52.3 | dw |
| 16 | 5723X947 | Kamsky | 304.7 | 8.4 | 8 | 52 | 14 | 13.3 | 46.7 | 12 | 46.2 | T w |
| 9 | X64-8973 | On A Jeune | 456.9 | 0.2 | 53 | 53 | 16 | 19.4 | 48.4 | 6 | 43.5 | WH |
| 20 | 57571840 | Flag Raiser | 749.5 | 13.6 | 33 | 52 | 8 | 7.8 | 33.3 | 17 | 40.2 | 0 t DwH |
| 17 | X39X6421 | Eddy And Dpostman | 999.9 | 0 | 53 | 52 | 17 | 17.1 | 42.9 | 15 | 26.7 | dWh |

Now checking components of the Winform Ratings and the additional statistical information of GTX, we can take a closer look at: "On A Jeune", this sheds more light on it's winning potential.

→ Last Winform Rating before the Geelong Cup

→ Past high scoring Winform Rating on Good Tracks

Illustrated by GTX in the previous diagram: Looking at “On A Jeune” we can see in his last 6 runs, the majority of them have been run on wet tracks (which is shown in the “C” condition column). Over the duration of these races, his last Winform Rating prior to the Geelong Cup was 30.1 (as represented by the “WF” column), which explains his poor positioning in the Winform Ratings.

As the Geelong Cup track conditions were predicted to be good you can see by looking at: “On A Jeune’s” History on GTX, runs 7 through to 10, the majority have been run on good tracks, with the “FP” column proving that he had some good placings and more importantly his Winform Rating (as represented by the “WF” column) have climbed from 61.0 to 85.6, which proves him to be a horse of great potential in the Geelong Cup.

GTX once again reinforces it’s benefits in the graph’s below. The graph to the left clearly represents “On A Jeune’s” last 16 runs to coincide with his Winform Rating, which explains his 85.6 rating as the bar goes past the 70 point mark (which was obviously ran on a good track). Where the bars descend, this represents his poorer performances on wet tracks that is emphasized with his 30.1 Winform Rating.

Alternatively in the right graph (In the shaded area within this part of the graph) are the distances previously run close to the distance of the Geelong Cup (2400m). Obviously all the runs in this section have been rated very highly, with 3 out of the 4 scoring a high Winform Rating. This means that majority of these runs have been on a good track and the distances and conditions are similar to that of today’s race, so we can only conclude that “On A Jeune” is a potential winner. Based on the new rating “On A Jeune” is assessed at \$2.20.

“On A Jeune” Flew home to take the Geelong Cup and paid \$13.40 for the win. Having the advantage of GTX, it allows you to cover and analyse more crucial statistical information which ultimately can help you find more winners.

PRODUCT OF THE MONTH: Winform Ratings & GTX Package

This month Winform is presenting an offer you cannot go past!

Now you are able to purchase the **Winform Ratings & GTX Package**. The package includes:

- The GTX Base Program
- 3 months Subscription to TRB’s 16 run Smartform that includes: Trackform Ratings and early odds prices for every TAB meeting in Australia everyday **PLUS**
- 3 months of Winform Ratings and System Selections (Including Winform **NEW** Single Selections: Winform Provincial, Metropolitan and Country. (valued at \$395)
- **ALL FOR \$999 (SAVE \$276)**

If you already have Winform Ratings and are just looking to subscribe to GTX, there is a **Starters Package** available which includes:

- The GTX Base Program (valued at \$385)
- A 3 month subscription to TRB’s Smartform (valued at \$495)
- **COST JUST \$749 (SAVE \$131)** We will then arrange for your Winform Ratings to be included in your GTX Package

BARRIER BOOK

James Thomson is not only a master sailmaker but a very astute punter. Within days of receiving the barrier books James devised separate systems for each field size and reports that all of them are making a profit after the first five weeks of use.

Our own personal theory is that horses drawn on the outside barrier at each distance could have a bit of an advantage. Can you think why? One of the best wins we have seen was by Show Barry in last month’s Cranbourne Cup. Show Barry drew barrier 13.

Anyhow, if you are interested in devising your own unique system based on barriers, you should purchase the Barrier Book which is only \$89 for Members. Maybe your partner can buy it for you for Christmas.

JOKE OF THE MONTH

“A young jockey and his stable lass girlfriend make the decision to get married. Everything is planned and the couple intend to honeymoon in Italy for a week. The marriage goes without a hitch and the couple set off on their honeymoon. While checking in the lady behind the desk asks “We have two suites available for you, would you like the bridal?” “No thanks” says the jockey, “I’ll just hold her ears till she gets the hang of it!”.

MELBOURNE CUP SYSTEM

Here it is again. This should stop all those phone calls the first Tuesday morning in November. Take the first three place-getters in the Caulfield Cup, Moonee Valley Cup and McKinnon Stakes. In The Moonee Valley Cup I also include 4th. You usually end up with three or four horses and the odds are so good you can’t lose. This system nearly always picks up the winner. Don’t discount the Moonee Valley Cup or you will miss the likes of Brew \$20 and Piping Lane 100/1. Sometimes you will get the same horse more than once and occasionally you will miss out like when Saintly skipped the major lead up races for the Cox Plate (could be the same this year with Makybe Diva).

GARRY’S DIARY

Those who get my weekly email would be aware that I have an online diary at the website. It is always in the Current Edition and is updated most days. I hope readers enjoy it, and of course, I always include any late news like my strategy for the Caulfield Cup which got an excellent profit and almost got the Quinella too.

I am writing this on October 21st just a couple of days after Brenton’s experiment with the new single selections scored another bonanza. After three weeks of operation the \$3,000 Bank has reached \$1300 profit and came within a neck of \$4300 (our \$46 selection paid \$9 the place). Brenton is simply betting the single selections each way. Here are the results for betting just the WFM, WFP, WFC and Grandslam selections from the 28th of September (our first day) until October 19th (and we have won more since).

| Bets | Wins | Places | Win Return | Win Profit | Place Return | Place Profit |
|-------------|-------------|---------------|-------------------|-------------------|---------------------|---------------------|
| 302 | 75 | 154 | 328.05 | 26.05 | 285.45 | -16.54 |

You would have to agree that the results are very satisfactory and in line with the expectations from last month’s tables. The place return is based purely on TAB prices but betting eachway with bookmakers, as Brenton does, improves things considerably. For normal betting, we simply recommend win betting. The eachway strategy is only recommended using Money Factory as this means we are getting something back about 50% of the time. The NEW single selections can be purchased separately for the same price as Ratings but those who already have ratings get them for free!

I have one personal problem which I know is shared by many of our Members. I am experiencing some numbness in my right arm following a capsizing in my sailing dinghy a few weeks ago. It may be a carpal tunnel injury (I think I’ve got it right) but that is not good news for someone who spends all day on the computer writing as I do. My neighbour had a repair a few months ago and is not happy with the results. He feels he is worse off after it. One thing I have noticed is that it always feels better after a winning day.

ONLINE VIDEO is here and I am not sure if I mentioned it last month. If you have a NSW TAB account you can view Skychannel for free on your computer but only if you have broadband or ADSL access. I have used the service on a semiregular basis and it seems O.K. but at times of high demand e.g. Saturdays, the service is failing although the back up radio broadcast remains. It’s important to be aware that what you see can be as much as one minute behind the actual race so don’t leave getting bets on until too late. I usually listen to the radio and then in a close finish look at the screen and can see everything that happens because I now know what to look for.

WE HAVE a few different types of Members. Some simply want us to provide the selections so you can put them on and forget about it until you get the results. Some want to get our ratings and then apply their own criteria. The new Barrier book would be of assistance to those Members. Also, those who want to delve more deeply into the ratings, would benefit from having the GTX program. The example in this Newsletter is but one good reason. One other is that track conditions can change during the day. Members getting their ratings through GTX can adjust them to suit the conditions.

I wish you all a fabulous Melbourne Cup Day and I just hope I am able to provide a winning strategy.
